## TRACT 29-22 – HARVEST REQUIREMENTS

The following terms and conditions supplement those provided in the Bayfield County Timber Sale Contract.

### A. PRESCRIPTION:

1. Harvest prescription involves clearcutting 51 half acre gaps

### B. HARVEST REQUIREMENTS:

1. There are 51 ½ acre gaps painted 5 chains apart from gap center to gap center. Gaps have 8-10 painted trees. 2 dots face into the gap with a slash on the backside of those same trees.
2. Harvest all hardwood 2" and greater except leave all conifer within the purple painted ½ acre gaps.
3. Operational trees will need to be removed to create trails between gaps. Stand is open enough that no sawlog trees should be taken as operational trees.
4. If harvest will utilize the whole tree, 1 in 10 tops must be left scattered throughout the sale.

### C. ACCESS AND ROADS:

1. Access is off echo valley road with trails running through the sale. Main access road is also a snowmobile trail.
2. During winter harvesting the snowmobile trail must be kept unobstructed and in a packed snow condition. The purchaser must ensure that harvesting and hauling operations will not create a safety hazard to snowmobiles. Avoid damage to signs and trail markers

### D. OTHER:

1. There are some vernal pools within this sale. No equipment or trees may be go in the vernal pools.
2. No sale operations between breakup and July 15 to prevent bark peeling and reduce two lined chestnut impacts.
3. In 2018, oak wilt was officially confirmed in Bayfield County. Currently, this timber sale is located more than six miles away from the closest known infected tree. However, over the duration of this contract, additional infections could be discovered. If, over the duration of this contract, including extensions, oak wilt is officially confirmed within a six mile radius of this timber sale, as determined by the county, the following seasonal restriction will be applied: no harvesting operations will be allowed between April 15 (or as otherwise determined by the county) and July 15
4. To comply with Best Management Practices for Invasive Species: Prior to moving equipment onto or off the sale area, scrape or brush soil and debris from exterior surfaces to the extent practical.
5. Do not damage any survey monumentation.
